

Practical Seminar 2

JANUARY 28th 2010, 9:00-16:00

You and your colleagues interpret images taken from a variety of sources including satellites and reconnaissance aircraft. This information can be vital and may include intelligence central to a battle, such as the exact location of the enemy and what he intends to do. National security organisations are increasingly working with the defence forces to share and analyse information jointly. This enables quicker and more effective decision-making. Developments in technology mean that YOU need to remain on top of your game despite constantly evolving new platforms and sensors. Modern imagery sources mean that Imagery Intelligence can be collected, collated, analysed and disseminated in just hours - minutes if the commander needs it immediately!

Accessing The Latest GIS Tools & Imagery To Drive Your GIS Capability

9:00 - Improving Your Geospatial Intelligence Analysis Strategy
JOIN THIS SEMINAR TO LEARN ABOUT:

- effective strategies for context based analysis
- ensuring maximum accuracy and optimising timing of your analysis
- Digitalglobe's Constellation - supporting your geospatial intelligence operations

10:30 - Morning Coffee

Morning Coffee

11:00 - Practical Session

Practical Session – question the experts, explore how your particular challenges can benefit from context based analysis, learn how you can effectively implement a time and accuracy improvement strategy into your GIS capability.

12:15 - Lunch & Questions

Lunch & Questions

13:15 - Overcoming The Practical Challenges Of Effective Imagery Exploitation

- Using common Nomenclature – what are the practical advantages
- Overcoming the challenges of using agreed NATO standards
- Moving towards effective use of a coalition shared database

14:30 - Afternoon Coffee

Afternoon Coffee

- ▣ 15:30 - Practical Overview Of The ISR Cycle – Responsibilities & Organisations Involved

Practical Overview Of The ISR Cycle – Responsibilities & Organisations Involved

- ▣ 16:00 - Evaluation & Practical Testing Of Key Products Involved In Your GIS Imagery Management Strategy.

Join this session to find out what solutions are available for your imagery exploitation capability and how your organization can benefit from these technological advances. Try new tools, see new capabilities, experience the live demos.
